

Features

-) **Assembled for each Specific Engine Application meets or exceeds OEM Specification**
-) **Large stock of standard leads available for immediate shipment**
-) **Made of proven components for the longest possible life cycle and operating conditions**

Only high quality secondary wire, terminals, boots , adapters are used in the design, construction and assembly process. In many cases the spark plug lead has evolved given the new materials and designs being available, to offer a longer life cycle. Kraft Power can assemble direct replacement spark plug leads from a large selection of high quality components to insure you get a spark plug lead that will be equal to or better than the OEM lead. Given our engine experience we have a knowledge base of what will work, even in the most demanding of applications. We have a large inventory of spark plug leads for a variety of engine make and models. Should you want to upgrade your current spark plug lead for improved performance, we can help. We can also customize a lead for your engine !
